

Expand your sources of revenue

Wide-format inkjet printing is one of the most profitable areas of printing so adding a wide-format solution to your business can provide additional healthy margins at a low investment risk. It will enable you to expand your print capability, become a one-stop-shop for full campaign management and add real value to your customer relationships.

Buy from the number one supplier of wide-format flatbeds

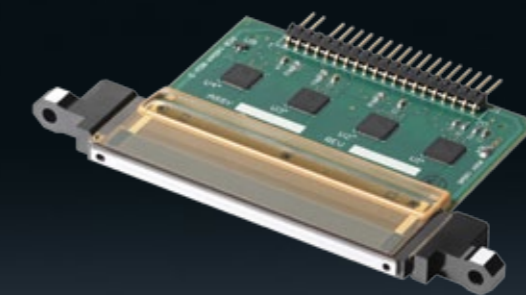

Fujifilm has helped more printers introduce digital wide-format flatbed production machines into their businesses than any other company, with an installed base of over 200 digital production presses in Europe.

Choose from the widest range of flatbed inkjet presses

The Fujifilm Acuity Advance and Inca wide-format ranges of inkjet presses, combined with Fujifilm Sericol UV inks, represent the most complete range of high performance flatbed inkjet production systems on the market.

Pick a reliable, proven system

The compatibility and performance of an inkjet printhead and ink is critical to any wide-format printing system. The combination of Fujifilm Sericol ink and Fujifilm Dimatix Spectra printheads in all Inca Digital flatbed equipment means each system is highly tuned for optimum performance and reliability.

Achieve stunning quality with Fujifilm high performance ink

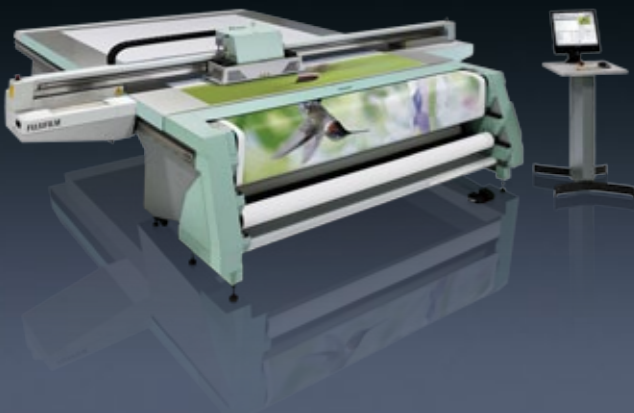

Fujifilm Sericol is the longest standing manufacturer of UV inkjet inks, having invented the original UV inkjet inks used in the very first flatbed digital wide-format presses. These inks have benefited from continued development, with the resulting Uvijet Ultratone inks now able to produce stunning quality, unsurpassed for wide-format applications.

Profit from a wider range of print...

Acuity Advance

Exceptional quality print
Flexible with roll-to-roll option
